## SUMMARY

IT Trainer and Full-Stack Developer with experience building web applications and managing academic and institutional projects. Proficient in Node.js, MongoDB, React, and creating role-based access systems. Have led small development teams, built secure APIs, and used automation to improve processes. Currently pursuing MCA. Looking for opportunities in backend or FullStack development work.

---

## EXPERIENCE

### At SSISM College (IT Trainer & Project Lead)

**Nov 2022 - now**

- Delivered 200+ hours of MERN, Git, and REST API training; improved batch results by 35%.
- Mentored 50+ students through technical projects from idea to deployment.
- Created internal tooling that automated test scoring and interview prep, saving 10+ hours/week.
- Trained students in the theory and practice of computer usage to fulfill learning needs.
- Maintained up-to-date knowledge of technological advancements, integrating new tools and techniques into training curriculums.
- Taught learners computer science principles to help with the proper care and operation of software and hardware.
- Assessed trainee performance through practical exams and quizzes, providing constructive feedback to promote continuous improvement.
- Administered assessments and tests, evaluated trainee performance, and implemented measures to help students overcome learning challenges.
- Offered constructive feedback to trainees to help improve comprehension and performance.
- Worked with faculty staff to create curricula, timetables, and learning objectives for IT courses.

### Boutique Business Owner (Self-Employed)

**Jan 2019 - Dec 2021**

- Handled 300+ tailored orders and digital customer tracking via spreadsheets.

- Streamlined order processing, resulting in 20% faster delivery cycles.
- Managed vendor relations and finances, achieving 15% year-over-year growth.
- Controlled expenses and allocated financial resources to reach budget goals.

#### **Advisory Firm - Assistant**

**Jan 2018-Dec 2019**

- Provided trading advice to clients based on expert inputs to help them make better profit decisions
- Assisted in managing client trading accounts and platform setups when requested
- Conducted sales and follow-up calls to onboard new clients and explain service plans
- Helped with customer support, explaining market trends, and risk handling in simple terms
- Maintained daily records of client activities, reports, and subscription status

#### **Ramkrishna Mission(Awakened Citizen Program - Resource person)**

**Jun 2017 - Dec 2017**

- Delivered training workshops to school teachers on a 3-year character-building program designed for student development
- Facilitated non-lecture-based learning modules using visual tools, real-life discussions, and interactive methods
- Monitored and supported the implementation of the program in schools, including Kendriya Vidyalayas, Navodaya Vidyalayas, and private institutions
- Assessed student engagement, teacher delivery, and program outcomes during regular school visits
- Helped introverted and non-academic students discover confidence and alternate career paths through values-based learning
- Selected and trained by Ramkrishna Mission under a national-level facilitator program

#### **Frontend Development Intern (Zool Technology)**

**Fab 2016 - Mar 2026**

- Completed a one-month internship focused on core front-end development.
- Learned JavaScript fundamentals, responsive web design, and basic UI/UX principles.
- Practiced building static pages using HTML, CSS, and JavaScript.
- (Certificate available)

---

## **SKILLS**

### **Technical Skills**

- **Languages & Web:** JavaScript, Java, HTML, CSS
- **Backend & Databases:** Node.js, MongoDB, MySQL
- **Tools & Utilities:** Git, GitHub, Postman, VS Code, REST APIs, Webhooks
- **Other:** Role-based access control, Software application knowledge

### **Development & Management Skills**

- Web development, Project management, Programming proficiency, Curriculum development
- Knowledge of databases, Technical training, Technical communication, Classroom management
- Facilitation excellence, Software documentation, Time management, Decision making

### Soft Skills

- Customer service excellence, Client engagement, Attentive listening, Team building
- Communication, Time-management, Mentorship, Leadership

---

## EDUCATION

### Master of Computer Applications (MCA)

*Dr. A.P.J. Abdul Kalam University, Indore*

2023 – 2025 | First Division

### Bachelor of Science in Computer Science (B.Sc.)

*Vikram University, Ujjain*

2014 – 2017 | First Division

---

## PROJECTS

### ITEG Management System (Full Stack, Live)

**Tech: Node.js, Express.js, MongoDB, React, JWT, Webhooks**

- Built a full-stack platform managing 100+ student records from admission to placement
- Designed and implemented 3-tier role-based access (super admin, admin, faculty)
- Created automated test scheduling and technical round modules
- Integrated secure JWT auth and Google Meet API for real-time scheduling
- Led an 8-member dev team; improved workflow and task assignment by 45%
- Automated daily scoring reports, cutting 60% of manual tracking effort
- Enabled real-time alerts via webhooks and Gmail API integration

### Projects Mentored (as IT Trainer & Project Lead)

#### Machinery Rental Management System (MERN Stack | 2 students |)

- Guided students in building a full-stack platform for renting machinery (tractors, cars, etc.) in rural areas
- Helped implement features like machine listing, user login, rent calculation (hour/km), and booking system

- Supported the development of billing automation with PDF generation and WhatsApp sharing
- Designed an account tracking system for total, paid, and pending rent
- Reviewed backend logic, secured APIs with JWT, and assisted in deployment
- Mentorship resulted in successful job placements for both students

#### **Additional Mentored Projects**

- Provided mentorship to multiple BCA students from project ideation to deployment
- Helped with database schema design, authentication logic, and real-time features (e.g., chat, test scoring)
- Assisted in deploying projects on Render, Vercel, and Firebase, and integrating with tools like Postman and GitHub
- Mentoring contributions have led to successful academic submissions, internships, and full-time job offers

---

#### **CAREER GOAL**

To work as a developer where I can learn new technologies, grow through real-time work, and contribute to a good company with dedication.
